ROLL NO: 241901090

EXPERIMENT 8

COLLECTING EMAIL EVIDENCE IN VICTIM PC

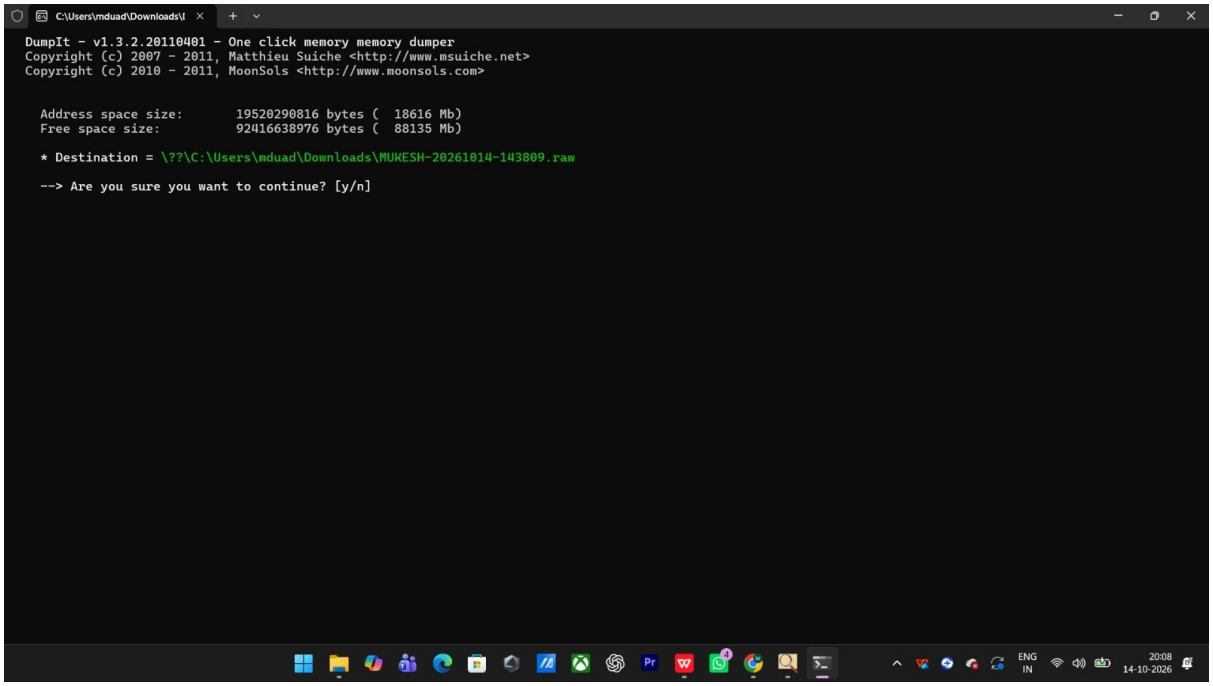

AIM

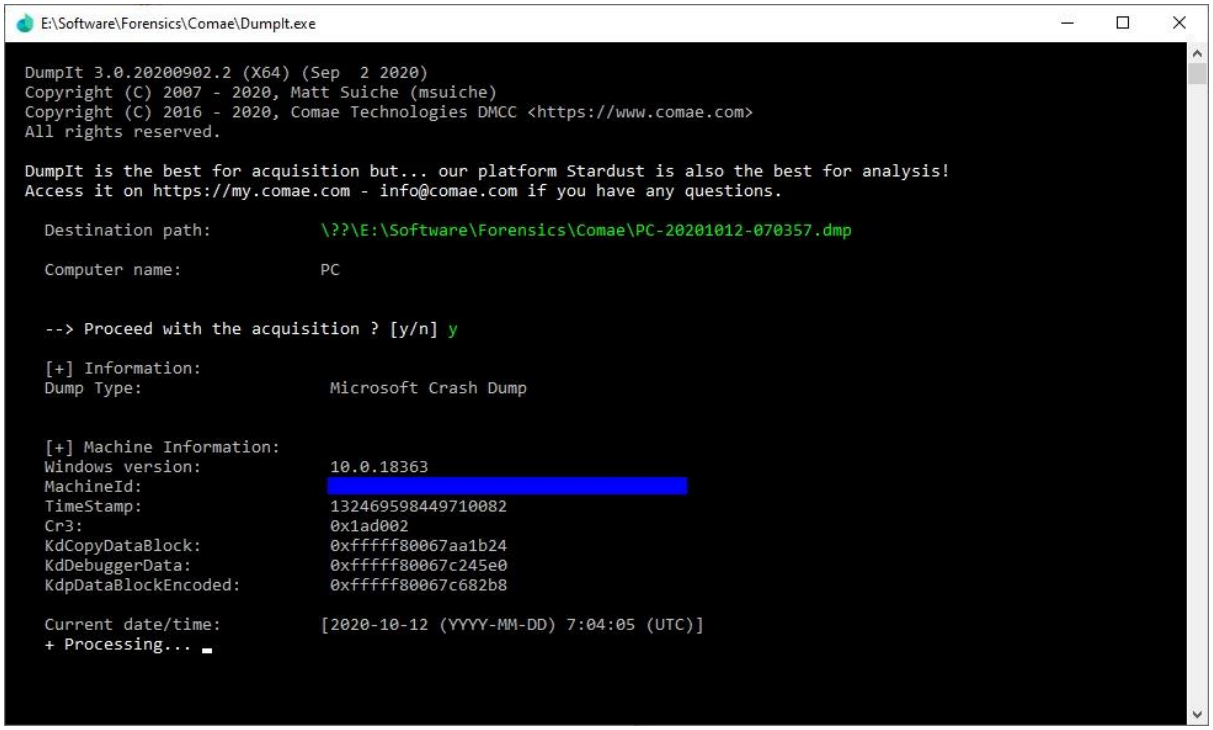

To collect and examine email evidence from a victim's computer for digital forensic investigation.

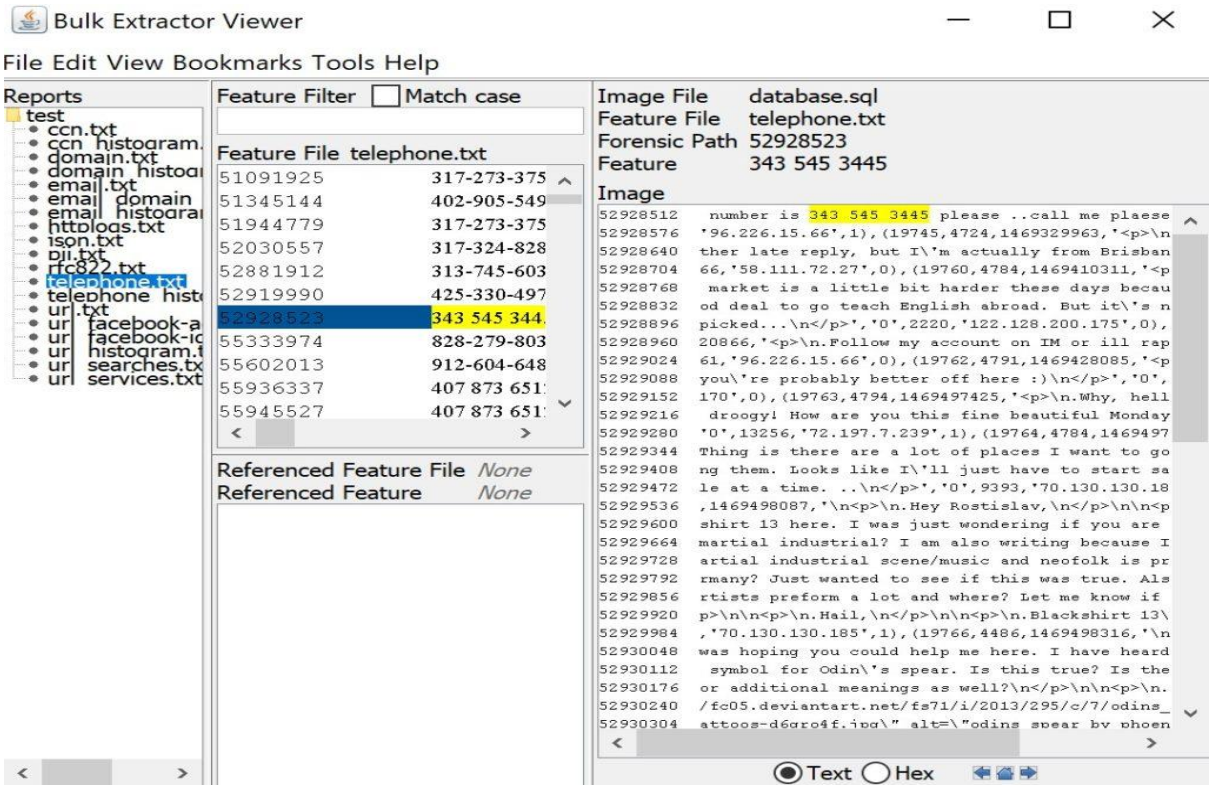

PROCEDURE

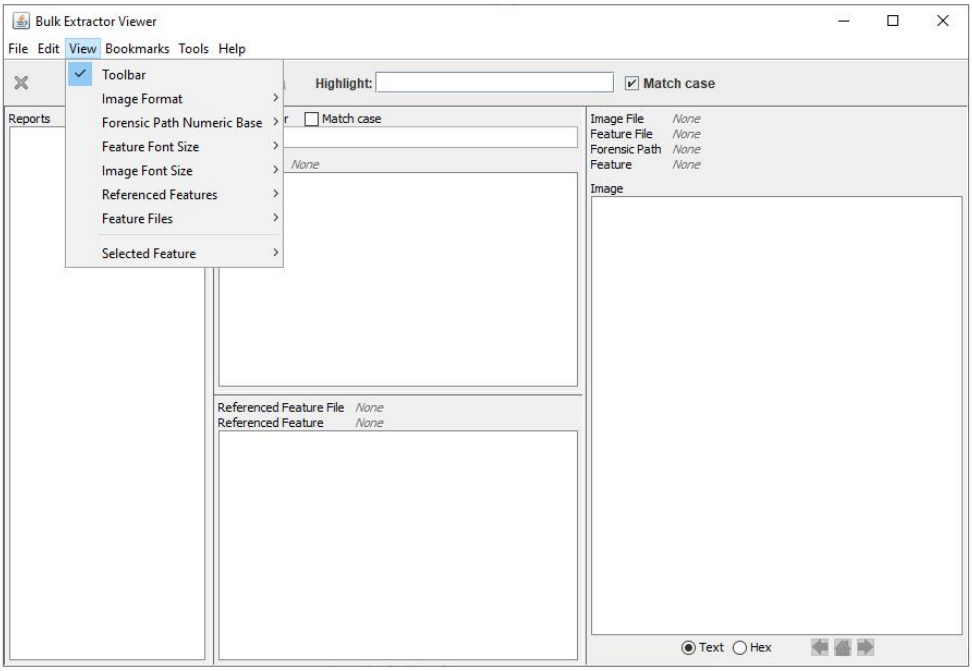

1. Identify the computer or forensic image from which email evidence needs to be collected.
2. Open a suitable digital forensic tool.
3. Locate the email storage files or folders on the system.
4. Identify the email client used on the computer, if applicable.
5. Search for stored emails and related email data.
6. Examine email details such as sender, receiver, subject, date, and time.
7. Inspect email attachments and related files, where available.
8. Preserve the collected email evidence without modifying the original data.
9. Record the findings and document relevant email evidence for further investigation.
